

React Frontend Developer

Academic Projects	
Quantum Leap - Conversational Image Recognition Chatbot (Project Lead, SAIT Bangalore) Project Link Oct'24 – Ongoing	
Responsibilities & Impact	- Built the frontend for an AI image recognition chatbot using React, enabling image uploads and interactive user experiences. - Developed dynamic interfaces to handle image and text input, integrating with ResNet-152 and GPT-2 backend APIs for analysis and response. - Collaborated with backend teams to ensure seamless data flow with MongoDB and enhance chatbot performance. - Designed a responsive UI that displays real-time JSON responses, improving usability and accessibility.
Initiatives	Optimized React components, cutting load times by 30% for smoother performance. - Added drag-and-drop uploads and live feedback, boosting engagement by 20%. - Implemented secure JWT authentication and created a feedback system for user suggestions, enhancing security and interactivity.

JAT – Business Administration Portal (Frontend Developer , Project Lead) Website Link Aug'24 – Nov'24	
Responsibilities & Impact	- Led the frontend development using React, Vite, and Tailwind CSS, creating a responsive UI for a seamless user experience. - Managed backend integration with Spring Boot, ensuring smooth data flow between the admin panel and product management systems. - Integrated SMTP for automated email notifications and implemented SSL for secure communication, enhancing customer engagement and data security. - Collaborated with the team on deploying the solution on AWS, using Nginx for reverse proxy and S3 for scalable media storage.
Initiatives	- Delivered a production-ready platform that improved workflow efficiency by 30%, reducing manual tasks and enabling smoother business operations. - Streamlined the inquiry-handling process by automating responses and improving lead visibility, allowing the business to focus on conversions. - Designed an intuitive admin panel, simplifying catalog updates, pricing, and inventory management for the business owner. - Enhanced SEO to improve search engine visibility and ranking, driving more traffic to the website. - The system saved the client time, increased profitability, and reduced reliance on manual administrative tasks

ACADEMIC QUALIFICATIONS			
Degree / Examination /Board	Institution	% / CGPA	Year
B.E CSE , VTU	Sambhram Institute of Technology, Bengaluru	8.1 CGPA	2021-2025
PUC , KSEEB	Vijaya Bifurcated PU College ,Bengaluru	88.16%	2019-2021
Class X, KSEEB	L.R Cambridge School , Bengaluru	87.84%	2019

Technical Skills	
Frontend Development	React, Vite, Redux, Tailwind CSS, Bootstrap, Framer Motion, Material UI, Axios, Responsive UI Design
Backend Integration & DevOps	Node.js, Express.js, Firebase (Realtime Database, Authentication), API Development, Postman, Docker,
Data Management	MySQL, Firebase, MongoDB.
Testing & Development	Postman, Jest, End-to-End Testing (E2E)
Version Control	Git, GitHub

EXTRA-CURRICULAR ACHIEVEMENTS	
Leadership Role	Led the frontend development team for the Jai Ambay Tarpaulin Website project , managing both design and backend integration efforts
SIH	SIH 2024 – Built a website prototype that increased user engagement by 20%, demonstrating leadership and technical expertise.
Sports Leadership	Led and organized intra-school sports events, managing team coordination and overseeing event planning to ensure smooth execution of tournaments
